This Listing of Claims will replace all prior versions, listing, of Claims in

the Specification.

Listing of Claims:

1. (Currently Amended) A phosphate-based ceramic composition with a

low dielectric constant, comprising:

(a) a portion represented by the following formula:

$$(1-x)(A'_{1-y}A''_{y})O-xP_{2}O_{5}$$

wherein A' and A" are each independently Ca, Ba, Sr, Zn, Mg, Ni,

Mn or Cu,

and x and y are numbers satisfying the following conditions: $1/5 \le x$

< 2/5 and $0 \le y \le 1$, x being defined in molar ratio, wherein said phosphate-based

ceramic composition has a dielectric constant of 13.2 or less; and

(b) 0.01~5 parts by weight of at least one sintering assistant selected from

the group consisting of CuO, B2O3 and Bi2O3 based on 100 parts by weight of the

composition.

Claims 2-11 (Canceled).

MR2685-153

Serial Number: 10/722,491

Reply to Office Action dated 3 February 2006

12. (New) A phosphate-based ceramic composition with a low dielectric constant, comprising:

a portion represented by the following formula:

$$(1-x)(A'_{1-y}A''_{y})O-xP_{2}O_{5}$$

wherein A' and A" are each independently Ca, Ba, Sr, Zn, Ni, Mn or Cu,

and x and y are numbers satisfying the following conditions: $1/5 \le x < 2/5$ and $0 \le y \le 1$, x being defined in molar ratio, wherein said phosphate-based ceramic composition has a dielectric constant of 13.2 or less.
